Subject: Near Final Asbestos Report for panel members' Concurrence
Attachments: SACC Asbestos Report Final 08092020.docx

Hello Ken,

Attached please find the near final version of asbestos report that I plan to send out to the Committee for concurrence later today. I will ask if they: 1) concur; 2) concur with minor edits; or 3) non-concur.

It is the same as the draft I send you yesterday, except that the paragraph in question regarding environmental risk characterization is moved back to q.5 with the following changes:

- 1) The title for q. 5 is changed to Human Health and Environmental Risk Characterization. I checked the charge questions for q.5, actually q.5.3 and q.5.5 are for environmental or human health risk characterization. However, environmental risk characterization was not discussed in the responses to charge questions until q. 7.1. The language in that paragraph was taken out of response to q. 7.1. I modified the beginning of that short paragraph, with "With regard to environmental risk characterization...", and left that paragraph there. So hopefully, that paragraph will not be so out of place.

I still have not figured out how to change the links for "see recommendation X". But I suppose they can be changed in the final edits. I think we should send out this version to the Committee for concurrence since the change regarding the IUR is not editorial. Thank you very much for your hard work.

Diana
